

Environmental Management Policy

At Mainbrace Constructions we are committed to minimising our impact on the environment.

Within our operations, we continually review energy use, waste and natural resource use, and set objectives and actions to minimise environmental impact.

During construction we utilise best practice, environmentally conscious and sensitive approaches to minimise any negative impact on the environment.

In all our dealings we treat the environment responsibly and expect the same of all employees and contractors who work for us.

Our Environmental Management System has been developed to ensure it will:

- Comply with all relevant legal requirements;
- Be appropriate to the nature, scale and environmental impacts of our activities, products and services;
- Include a commitment to continual improvement and prevention of pollution;
- Provide a framework for setting and reviewing environmental objectives and targets;
- Promote correct use of storage and disposal of hazardous substances; and
- Ensure conservation of natural resources.

A handwritten signature in black ink, appearing to read "G. Scott".
